Projects

ByteBazaar (Multi-vendor E-Commerce Web)

- Implemented JWT authentication and role-based access control by building custom Express.js middleware and third-party API connections for a three-role multi-vendor platform.
- Built a responsive React.js frontend with TypeScript using component-based architecture and Bootstrap, supporting distinct dashboards for admin, seller, and buyer roles.
- Optimized data persistence by designing efficient Mongoose schemas to manage complex relationships between users, vendors, and products.

FineFit (Men Casual E-Commerce Store)

- Built a full-stack men's clothing store with React, TypeScript, Express, and MongoDB, featuring category browsing, a database-backed cart, checkout, and order tracking.
- Implemented JWT authentication with bcrypt hashing, plus an admin dashboard for managing products and orders with Cloudinary image uploads. Deployed the client and API on Vercel.

Portfolio Website

- Built and deployed a personal portfolio using React by implementing smooth-scroll navigation and a resume download feature, resulting in a live site accessible at affan-portfolio-08.vercel.app
- Optimized global accessibility by deploying the application via Vercel with GitHub integration
